PROJECTS

Resume Analyzer Built an AI-powered multilingual resume analyzer using React.js, Node.js, and Groq AI (Llama 3.1) with Firebase Authentication and a custom PDF parser. Supports 7 languages and provides Resume Score, ATS Score, strengths, and improvement suggestions.
SiteHealth Dashboard Developed a website health analyzer using React.js and the Claude API that scans any URL and reports on performance, security, page weight, and technical issues with improvement suggestions.
Figma Clone Built a collaborative real-time canvas editor inspired by Figma using Next.js, TypeScript, and Fabric.js. Supports real-time multi-user collaboration powered by Liveblocks with features including shape creation, drag-and-drop, and layered canvas elements.
Portfolio Site 🔗 Built a fully responsive personal portfolio using HTML, CSS, and JavaScript with sections for About, Projects, Experience, and Contact. Focused on clean UI, smooth navigation, and mobile responsiveness.
